Oct 19, 2026

Raymond Chelf

has successfully completed the online Specialization

UI/UX Design Fundamentals & Prototyping with Generative AI

The certificate holder can apply UI/UX design fundamentals and generative AI tools to create user-centric digital products, streamline workflows, and deliver innovative solutions. They demonstrate proficiency in usability, interaction design, and visual principles, applying techniques like heuristic evaluation, journey mapping, A/B testing, microinteractions, and responsive UI development using tools such as Figma. Through hands-on labs and projects, they have gained job-ready skills in wireframing, prototyping, usability testing, and applying AI for ideation, personalization, and design optimization, enabling them to accelerate workflows and stay competitive in the evolving UX/UI landscape.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
